

Australia Natural Wonders Guide (Chinese Edition)

1. Great Barrier Reef

Location: Off the northeast coast of Queensland (approx. 2,300 km long)

Highlights: World's largest living coral reef system; home to 1,500+ fish species and 400+ coral types. Ideal for diving and snorkeling.

2. Uluru (Ayers Rock)

Location: Southern Red Centre, Northern Territory

Highlights: A massive 348-meter sandstone monolith; glows vivid red at sunrise/sunset. Sacred site of the Anangu people.

3. Twelve Apostles

Location: Port Campbell National Park, Victoria (Great Ocean Road)

Highlights: Iconic limestone stacks formed by ocean erosion; tallest up to 45 meters. Dramatic coastal views.

4. Blue Mountains National Park

Location: Approximately 80 km west of Sydney, New South Wales

Highlights: Eucalyptus mist creates a 'blue haze'; features the Three Sisters rock formation and Wentworth Falls. Excellent hiking.

5. Shark Bay

Location: Mid-west coast of Western Australia

Highlights: UNESCO dual World Heritage site — contains stromatolites (Earth's oldest living fossils), Lake Hillier (pink lake), seagrass meadows, and dugongs.

6. Lake Hillier

Location: Middle Island, Shark Bay, Western Australia

Highlights: Permanently pink lake visible from air; color caused by halophilic algae and bacteria. Looks like cotton candy.

7. MacKenzie Falls

Location: Grampians National Park, Victoria

Highlights: One of Victoria's tallest waterfalls (100 m drop); powerful in wet season, accessible cave behind the falls in dry season.

8. Fraser Island

Location: Southeastern Queensland — world's largest sand island (123 km long)

Highlights: Rainforests grow on sand dunes; 72 freshwater lakes (e.g., Lake McKenzie); home to wild dingoes.

9. The Pinnacles

Location: Near Perth, Western Australia (Nambung National Park)

Highlights: Tens of thousands of ancient limestone spires rising from yellow desert — surreal, otherworldly landscape.

10. Kakadu National Park

Location: Northern Territory, approx. 170 km east of Darwin

Highlights: Tropical wetlands + monsoon forests + 20,000+ year-old Aboriginal rock art; habitat for saltwater crocodiles and white-bellied sea eagles.

Tips: All sites are protected within national parks or UNESCO World Heritage areas. Please respect nature, follow park rules, and leave only footprints.
