

Australia Natural Attractions Travel Guide

Explore Earth's pristine natural wonders in Australia.

1. Great Barrier Reef

- Location: Northeastern coast of Queensland, 2300 km from Torres Strait to Bundaberg
- Coordinates: 18 S, 137 E (main access: Cairns, Whitsundays)
- Highlights: World's largest coral reef; 400 coral species, 1500 fish species
- Activities: Snorkeling, diving, glass-bottom boat tours
- Best time: May to October

2. Uluru (Ayers Rock)

- Location: Southern Red Centre, Northern Territory
- Coordinates: 25.3444 S, 131.0369 E
- Highlights: Monolithic sandstone (348 m high); sacred Anangu site; color changes at sunrise/sunset
- Note: Climbing prohibited
- Stay: Yulara or Alice Springs

3. Twelve Apostles

- Location: Port Campbell National Park, Victoria (Great Ocean Road)
- Coordinates: 38.6193 S, 142.8123 E
- Highlights: 8 limestone stacks formed by erosion
- Best view: Dawn or dusk
- Nearby: Loch Ard Gorge, London Bridge

4. Blue Mountains National Park

- Location: 80 km west of Sydney, NSW
- Coordinates: 33.7133 S, 150.3747 E (Three Sisters)
- Highlights: Blue haze from eucalyptus oil; Wentworth Falls, Jamison Valley
- Activities: Scenic World railways, Katoomba Falls hike

5. Daintree Rainforest

- Location: Far North QLD, 120 km north of Cairns
- Coordinates: 16.4250 S, 145.3833 E
- Highlights: Oldest tropical rainforest (>180 million years)
- Wildlife: Cassowaries, tree kangaroos
- Note: Night walks recommended; permits needed for some areas

6. Fraser Island

- Location: Off southeastern QLD, near Hervey Bay
- Coordinates: 24.9997 S, 153.2990 E
- Highlights: World's largest sand island (1840 sq km); 72 freshwater lakes
- Requirements: 4WD vehicle, camping permit
- Wildlife: Dingoes (observe from distance)

Fact: Australia has 500+ national parks and ~20 UNESCO World Heritage natural sites.

How to find photos: Search "Twelve Apostles photo", "Uluru sunset" etc. on Google or official tourism sites.
